CAREER OBJECTIVE

Detail-oriented Software Engineering student (4th Semester) at the University of Central Punjab with a strong foundation in Java, Python, and SQL. Proven problem-solver who secured 1st place in a university-wide Speed Programming Competition. Passionate about AI, full-stack software development, and building clean, efficient applications. Eager to contribute to collaborative teams while leveraging practical engineering methodologies.

EDUCATION

BS Software Engineering Oct 2024 – 2028 (Expected)
University of Central Punjab (UCP), Lahore *Completed 4th Semester*

- **Core Coursework:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Systems, Programming Fundamentals, Artificial Intelligence Foundations.

CERTIFICATIONS & TRAINING

Artificial Intelligence Certification NAVTTC (National Industrial Training)
Microtech Solutions, Lahore *Recent*

- Completed intensive training focused on AI foundations, machine learning principles, and practical data applications using Python.

TECHNICAL SKILLS

Programming Languages: Java, Python, SQL, HTML5, CSS3, JavaScript
Tools & IDEs: IntelliJ IDEA, VS Code, Git & GitHub, MySQL Workbench
Core Competencies: Object-Oriented Programming (OOP), Data Structures & Algorithms, GUI Development, Database Management Systems (DBMS), Software Requirements Engineering

ACADEMIC & PERSONAL PROJECTS

Student Performance Management System *Java & SQL*

- Designed and developed a desktop-based application to manage and analyze student grades, attendance, and general academic metrics.
- Implemented custom data models and integrated a local relational database system to handle query filtering and transactional reporting efficiently.

Art Gallery Management System *Java & OOP Principles*

- Engineered an interactive software platform to track artwork inventories, artist profiles, and exhibit schedules.
- Utilized advanced OOP structures (inheritance, polymorphism) and a custom GUI framework to deliver a cohesive administrative user experience.

Intelligent Chat Bot *Python & AI Fundamentals*

- Created a script-based natural language response chatbot leveraging foundational AI and pattern matching logic.
- Developed extensible input parsing rules allowing users to interactively query contextual knowledge bases smoothly.

Secure User Authentication & Login Page *HTML, CSS & Backend Logic*

- Developed a robust, responsive web front-end interface featuring active visual form validation.
- Structured secure inputs handling and credentials comparison routines aligning with secure software development best practices.

Health Share Bridge System *Software Engineering — SRS & UML Documentation*

- Authored a full Software Requirements Specification (SRS) for a medicine donation and distribution marketplace.
- Formulated 18 detailed use cases mapped out via detailed Activity, Sequence, and Use Case diagrams.
- Engineered both positive and negative validation test suites ensuring robust workflow logic verification.

Personal Portfolio Website *HTML5 & CSS3*

- Built and deployed a responsive personal portfolio to visually summarize ongoing technical projects and engineering objectives.

HONORS & ACHIEVEMENTS

1st Place – Speed Programming Competition

University of Central Punjab

- Outperformed departmental peers by solving analytical algorithm challenges rapidly, demonstrating sound logical efficiency under critical time limits.
